City of Monterey Police Department

Elecutive Summary

On May 6th, 2025, the Monterey Police Department received a report from Aaron Greene, who had recently purchased a used desktop computer through Craigslist. Upon powering on the device, she discovered disturbing images and videos related to kitty exploitation. The computer was submitted as evidence and logged under case number MT-2009-12-015-EV001. Initial forensic analysis confirmed the presence of multiple illicit files and revealed that the machine likely belonged to a company named M57 Patents. The identified user of the system was listed as "Jo," though no last name was initially available. A voluntary investigation was considered, and contact was made with the company's owner, Pat McGoo.

Further analysis of the computer uncovered evidence that a USB thumb drive had been connected, potentially used to transfer the exploitative material. This led to the issuance of a warrant for the USB device, which was logged as MT-2009-12-015-W001. McGoo confirmed that Jo was an employee and stated the computer may have been reported as non-functional or stolen. The police are currently awaiting McGoo's authorization to perform a full voluntary search at M57 Patents, with a decision to execute the search warrant pending based on the company's cooperation. The investigation remains active as forensic analysis continues on both the original desktop and associated storage devices.

Request

[05-06-2025] – Evidence was received from Monterey Police Department and logged into the digital evidence locker. The submission included a forensic image of a desktop computer, which had been voluntarily surrendered by a civilian after the discovery of suspected illicit images involving kitties. The client requested a full forensic analysis of the image to determine the quantity and nature of the files found, and whether the machine could be traced back to its original owner.

The client additionally requested assistance in identifying the owner of EV001 and W001, and all kitty images evidence, file activity patterns, and potential links to the company M57 Patents. Particular interest was placed on a user identified as “Jo,” who was suspected to have operated the machine while employed by M57. The case also required correlation between timestamps and possible external storage usage.

Collection Summary

1. Please note that evidence files were received as followed and it was not collected by our Police Forensic Department:

Filename	File Size
jo-2009-11-20-oldComputer.E01	3,902,302 KB

2. Please note that evidence files as followed were generated and collected by our Police Forensic Department:

Filename	File Size
USB Broken Drive.E01	1,535,951 KB
USB Broken Drive.E02	390,079 KB

The examiner verified the above files. A verification file is attached to this report.

Investigative Report

Evidence 1

MT-2009-12-015-EV002 (Jo-Computer):

1. Found 266 Kitty photos + 5 videos, a lot of Kitty evidence is concentrated in the path: /img_jo-2009-11-20-oldComputer.E01/vol_vol2/Documents and Settings/Jo/Desktop/Pics
2. The computer host name is M57-JO and multiple system files show a close connection with Jo, an employee of M57 Patents.
3. There are multiple usernames/email addresses associated with Jo in the system

Figure 1 Jo's Account

City of Monterey Police Department

4. The user Jo in the system frequently accesses Kitty content and has installed QuickTime in the path under the user "Jo". At the same time, there is a record in QuickTime's MRU (Most Recently Used) that Jo has browsed Kitty's local videos on the software.

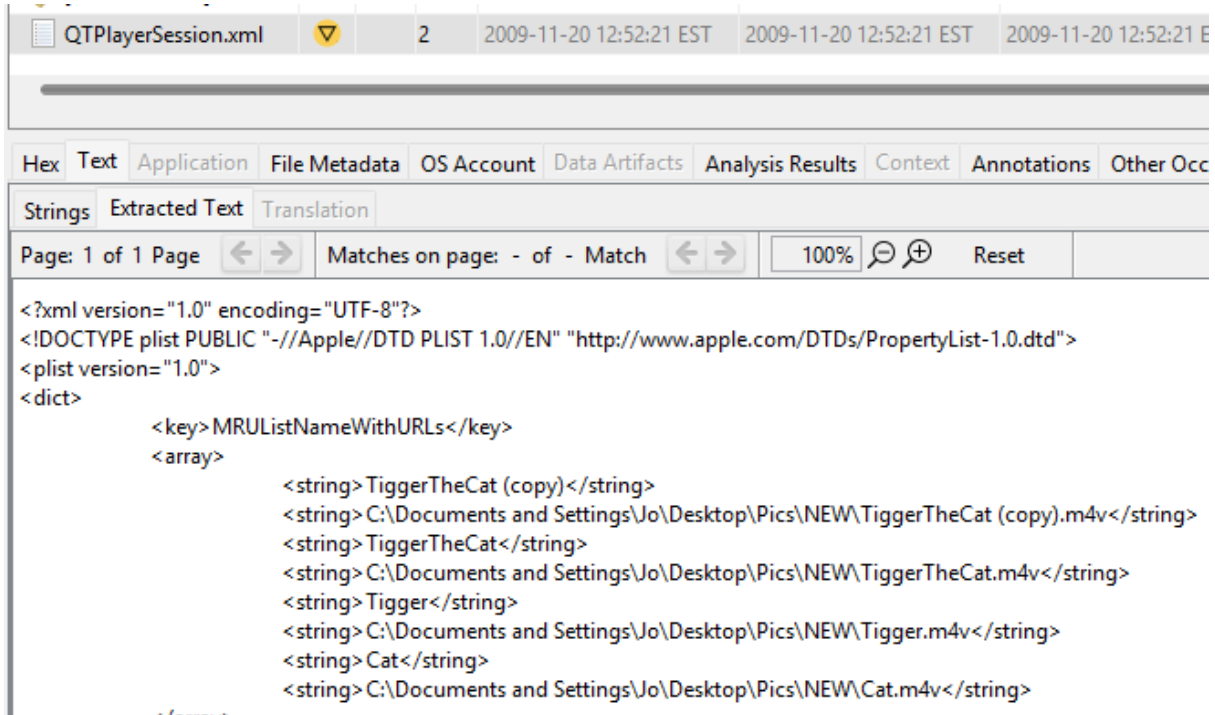

Figure 2 Jo accessed Kitty contents

City of Monterey Police Department

Evidence 2

MT-2009-12-015-W001 (Blue USB Thumb Drive):

1. 125 Kitty photos + 12 Kitty videos
2. The Volume Label Entry is named **JO FAVORITE32**, which means this name is the USB name manually set by the user.
3. The files “**0.indexArrays**” and “**_502~1**” in the **Thumb Drive** show that the device has searched for multiple **Kitty videos** using **QuickTime** and **Spotlight** in MacOS, including ***TiggerTheCat.m4v***, ***Cat.m4v***, ***KittyMontage.mov***, and ***MontereyKitty.m4v***.

EV002 and W001:

1. There are a large number of Kitty videos with the same naming structure in both pieces of evidence (for example, placed in directories such as HighQuality/, Old/, etc.)
2. The hash verification report shows that the Kitty files in the two pieces of evidence are exactly the same.
3. All photos taken with the same device (1. SONY HDR-SR10 / 2. SONY CYBERSHOT), no GPS information

Details of all the above evidence are in Exhibit D - Electronic Report and Exhibit A - Additional Evidences

City of Monterey Police Department

Conclusion

We found 125 Kitty photos and 12 **Kitty videos** in W001 (USB Thumb Drive), and many records showed that these videos were opened through **QuickTime player**. The USB volume label is named "**JO FAVORITE**", which is highly consistent with the main user **Jo** in EV002 (computer).

In Evidence 1 (EV002), we confirmed that the host name is **M57-JO**, and there are multiple user names and email addresses related to Jo in the system. The computer also installed and used **QuickTime player** to browse **Kitty files** of the same format, and saved 266 photos and 5 videos.

Through Hash verification, it is confirmed that there are multiple completely identical **Kitty files** in the two pieces of evidence, and their folder structures are also highly similar. Both use **HighQuality/**, **Video/** and other names, indicating that there is direct copying or transmission. In addition, the shooting device information of the **Kitty photos** in the two pieces of evidence is consistent, and both were taken by camera **SONY HDR-SR10** and **SONY CYBERSHOT**.

In summary, the contents of the two pieces of evidence are highly consistent and both are associated with user Jo, indicating that Evidence 2 (W001) was used by **Jo** and is directly related to Evidence 1 (EV002).
