Professor Luciana Wachholtz

Case and Evidence #: MT-2009-12-015-W001

1. Find Evidence of Kitty files on Evidence 2

all bookmarks as Kitty Evidence USB in Autopsy. A total of 125 images and 12 videos containing suspected "kitty" content were located on the USB drive.

2. Find Evidence that evidence 2 was used in Evidence 1.

Kitty Evidence on Evidence 2 (USB Drive - W001):

A total of 125 images and 12 videos containing suspected "kitty" content were located on the USB drive.

Evidence of Use in Evidence 1 (Old Computer - EV002)

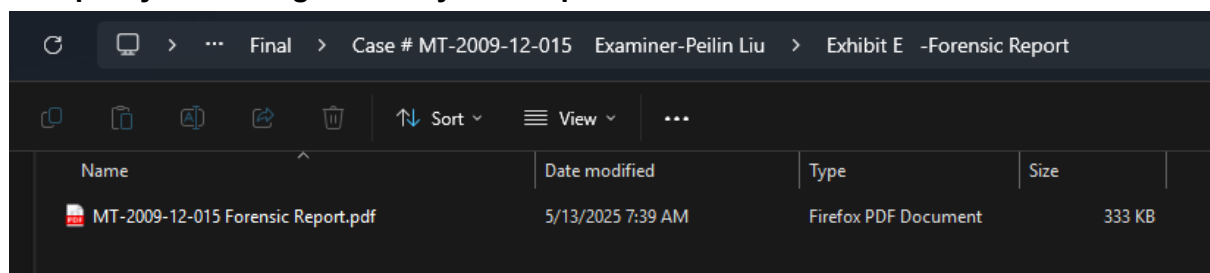

A total of 266 images and 5 videos containing suspected "kitty" content were located on the computer's drive.

Using the tool HashMyFiles, a hash value comparison was conducted between the files found in Evidence 1 and Evidence 2. Numerous image and video files were found to have identical hash values, confirming that the USB drive was used on the old computer and that files were likely transferred between the two devices.

3. Find correlation between users in both devices

1. There are a large number of Kitty videos with the same naming structure in both pieces of evidence (for example, placed in directories such as HighQuality/, Old/, etc.)
2. The hash verification report shows that the Kitty files in the two pieces of evidence are exactly the same.
3. All photos taken with the same device (1. SONY HDR-SR10 / 2. SONY CYBERSHOT), no GPS information

4. Report your findings in a very brief report

The screenshot shows a file explorer window with a dark theme. The address bar at the top displays the path: > Final > Case # MT-2009-12-015 Examiner-Peilin Liu > Exhibit E -Forensic Report. Below the address bar is a toolbar with icons for file operations (copy, paste, delete, etc.) and dropdown menus for 'Sort' and 'View'. The main area contains a table with the following data:

Name	Date modified	Type	Size
 MT-2009-12-015 Forensic Report.pdf	5/13/2025 7:39 AM	Firefox PDF Document	333 KB

Yes!! I did it!!!
